

Efficiency Vermont is a Registered Provider with ***The American Institute of Architects Continuing Education Systems (AIA/CES)***

Credit(s) earned on completion of this program will be reported to **AIA/CES** for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request.

This program is registered with **AIA/CES** for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.

Questions related to specific materials, methods, and services will be addressed at the conclusion of this presentation.

Learning Objectives

At the end of this program, participants will be able to:

- *Understand an overview of the Passive House Energy Standard*
- *Employ design strategies to achieve Passive House standards*
- *Be knowledgeable in the case study of two homes; the typical Habitat Cape and the new Passive House design*
- *Evaluate the benefits of modular building, including cost, quality, and the ability to replicate designs.*

Course Evaluations

In order to maintain high-quality learning experiences, please access the evaluation for this course by logging into CES Discovery and clicking on the **Course Evaluation** link on the left side of the page.

The screenshot shows the CESDiscovery website. At the top, there's a navigation bar with links: Discovery Home, Notifications, Scheduled Courses, Course Directory, Self-Report Activities, Transcript, and Resources. Below the navigation bar is a large image of a person working at a desk with a computer monitor displaying architectural plans. To the left of this image, the text "CESDiscovery" is written in red. On the right side of the image, there's a yellow arrow pointing towards the left side of the page. Below the image, there's a "Welcome, AIA Members" message. On the left, there's a sidebar with links: Update My Account, E-mail AIA/CES Member Care Center, and Course Evaluation. The "Course Evaluation" link is highlighted with a yellow arrow. At the bottom, there are four cards: "Find Courses" (with a brief description and a photo of binders), "Events" (with a photo of a calendar), "MCE Requirements" (with a photo of hands writing), and "Get Started" (with a photo of a hand). Each card has a brief description below it.

Energy Standard to Achieve Goal

Passivhaus Institut
Darmstadt, Germany

Passive House Institute US
Urbana, Illinois

GETTING TO PASSIVE HOUSE in VERMONT

Albert, Righter, & Tittmann Architects & Vermont Energy Investment Corporation

Passivhaus Principle:

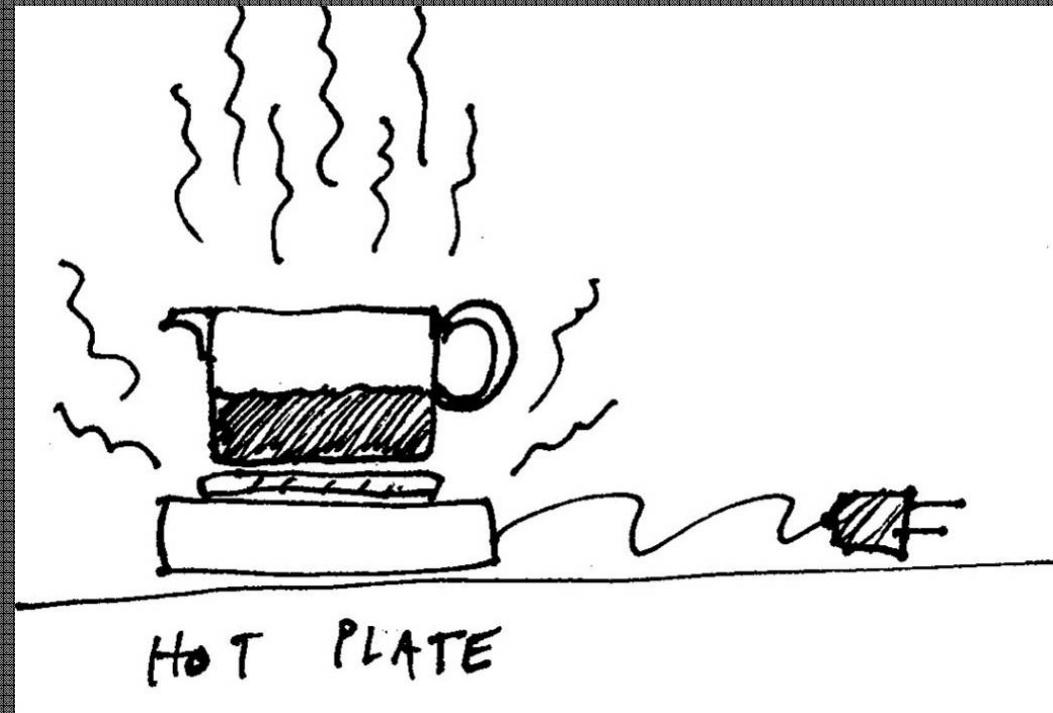

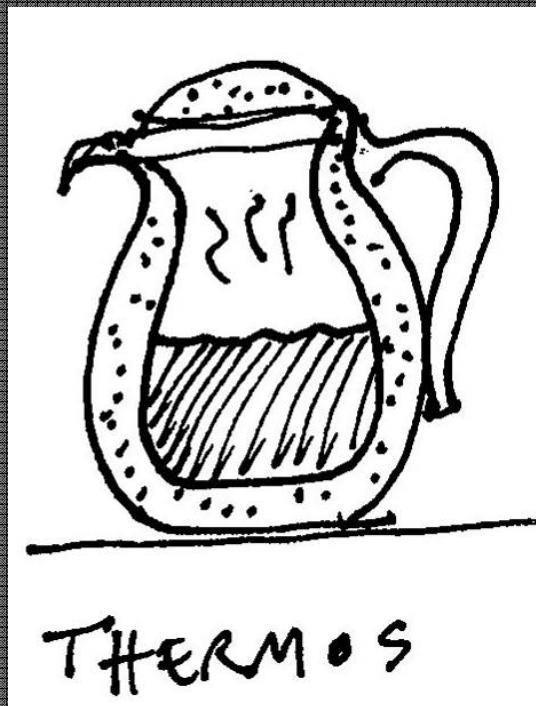

- Today's highest energy standard applicable to all building types
- Focuses on energy conservation through building envelope optimization
- Utilizes energy modeling software to inform design decisions
- 20,000 structures built in Europe

GETTING TO PASSIVE HOUSE in VERMONT

Albert, Righter, & Tittmann Architects & Vermont Energy Investment Corporation

Passivhaus Principle:

Maintain the temperature using insulation,
rather than by using energy.

GETTING TO PASSIVE HOUSE in VERMONT

Albert, Righter, & Tittmann Architects & Vermont Energy Investment Corporation

Passivhaus Results:

- Dramatic reduction in energy consumption
- Superior indoor air quality
- Occupant comfort
- Lower annual energy costs
- Smaller carbon footprint
- More durable construction details
