Tight Margins, Bold Moves: Building for
Affordability, Efficiency, and Electrification

Efficiency
Vermont

ANNUAL HIGHLIGHTS

The impact of Efficiency Vermont's technical, educational, and financial energy efficiency services

OUR RESULTS

We deliver energy savings that make Vermont economically stronger and more affordable for households, businesses, and communities, and help move the state toward its clean energy goals. Thanks to Vermonters' investment and participation, here are a few of the lifetime benefits cumulatively from 2000 to 2024.

Over
\$3.5 billion
saved by
Vermonters

Over
14.5 million
metric tons of pollutants
avoided

12.2%
households served
in one year

23.7 million
MWh saved

37.0 million
MMBtu saved

Earning Continuing Education Units (CEUs)

Please review the process below to ensure your credits are properly recorded.

AIA and BPI Members:

Current AIA and BPI members do not need to complete a CEU form, unless a certificate of attendance is needed. To receive AIA or BPI credits, simply have the barcode on your name badge scanned at the door as you leave each session you attend. Attendance will be tracked and reported on your behalf.

If you require a custom certificate of attendance, please complete the CEU form and return the completed copy to the registration desk.

All Other Attendees Seeking CEUs:

If you are seeking CEUs from any organization other than AIA or BPI, including if you are a non-AIA architect, you may use the CEU form to verify your attendance and self-report to the appropriate accrediting organization. During the conference, complete the CEU reporting form provided at the registration desk. Keep the original sheet (top) for your records and self-reporting and return the yellow sheet (bottom) to the registration desk for backup.

Certificates of Attendance:

If the CEU form alone is not sufficient for self-reporting CEUs and you require a custom certificate of attendance, please check that field on the form before returning the completed copy to the registration desk.

Important Reminder:

It is the attendee's responsibility to follow all CEU reporting procedures. Failure to do so may impact your eligibility to receive credit or documentation.

Residential New Construction

Multifamily Homes Affordable Housing Innovation Award

Project Winner: **Champlain Housing Trust**

Project: **10th Cavalry Apartments**

Location: **Colchester**

Judging Criteria:

- Energy efficiency upgrades to building envelope and mechanical systems
- Building performance—blower door testing and energy costs
- Non-energy benefits—indoor air quality and occupant comfort
- Affordability

Performance Excellence Award for Multifamily Homes

Project Winner: **Cathedral Square**

Project: **Reid Commons**

Location: **Saint Albans**

Judging Criteria:

- Demonstration of a comprehensive approach to energy-efficient new construction
- Building performance—blower door testing and energy costs
- Non-energy benefits—indoor air quality and occupant comfort

Affordable Housing Innovation Award for Single-Family Homes

Project Winner: **Central Vermont Habitat for Humanity**

Project: **41 Central Street**

Location: **Randolph**

Judging Criteria:

- Demonstration of a comprehensive approach to energy-efficient new construction
- Building performance—blower door testing and energy costs
- Non-energy benefits—indoor air quality and occupant comfort
- Affordability

Performance Excellence Award for Single-Family Homes

Project Winner: **Bellwether Craftsmen, LLC**

Project: **Rose Hill Lane**

Location: **Shelburne**

Judging Criteria:

- Demonstration of a comprehensive approach to energy-efficient new construction
- Building performance—blower door testing and energy costs
- Non-energy benefits—indoor air quality and occupant comfort

Commercial Building Design and Construction

Commercial Resilience Champion

Project Winner: **GeoBarns LLC**

Project Owner: **Eva Douzinas–Pleasant Garage**

Project Tenant: **Farmer and the Bell**
