

# Savings for Indoor Growing in Controlled Environments

Efficient cultivation equipment provides a cost-effective way to grow the best quality product while reducing operating costs.

Energy efficient equipment for indoor growing and processing facilities helps build a more resilient growing environment while increasing profitability through:

- ✓ **Enhanced Production**
- ✓ **Lower Energy Costs**
- ✓ **Optimized Staff Time and Labor Costs**

## Incentive Offers

- ✓ **Controls for HVAC and lighting:** Up to \$0.10/sq ft
- ✓ **LEDs for indoor growing:** Up to 30% cash back
- ✓ **Variable frequency drives (VFDs):**  
\$200/HP back for 2-5 HP motors or pumps  
\$150/HP back for 7.5-100 HP motors or pumps
- ✓ **Custom:** Based on your needs, customized rebates are also available to help pay for
  - Exhaust/circulation fans
  - HVAC and dehumidification systems
  - Drying or processing equipment
  - Refrigeration
  - Pumps and motors

## Other ways to save

- Special offers for hoop- and gable-style greenhouses
- Take a whole building approach to energy efficiency

## Get started today
