

## STEPS TO GETTING YOUR EFFICIENCY VERMONT REBATE:

1. Fill out this form completely and legibly. Incomplete information will delay or disqualify your rebate.
2. Enclose a copy of your dated sales receipt.
3. Sign and mail it to the address below or submit online at: [www.encyvermont.com/dryers](http://www.encyvermont.com/dryers)

**EFI-VT ENERGY STAR Dryer Rebate**  
**P.O. Box 2528**  
**Manchester, CT 06045**

(Do not include this rebate form with utility bill payment.)

All rebate forms must be postmarked no later than January 31, 2019.

Valid for purchases made 6/1/18 - 12/31/18. All rebate requests must be postmarked no later than 1/31/19. This rebate offer is available to all electric utility customers in Vermont. Dryer must be listed on the Efficiency Vermont qualified products list at the time of purchase and must be installed in Vermont to be eligible for rebate. This rebate may be subject to change without prior notice. This rebate may not be combined with any other Efficiency Vermont offer. Efficiency Vermont reserves the right to conduct field inspections to verify installations. The customer must contribute at least \$50 to the pre-tax purchase price of each dryer; therefore, the rebate amount for each qualifying dryer will be the lesser of (a) the applicable rebate listed on this form ("standard," "plus" or "premium"), or (b) the pre-tax purchase price of the dryer minus \$50. Limitation of liability: Efficiency Vermont does not guarantee the performance of installed equipment expressly or implicitly, and will not be liable for any incidental or consequential damages of any kind in connection with the rebate program or in connection with the installation, implementation, or use of the equipment at the customer's premises. In accepting these financial incentives, the customer agrees that Efficiency Vermont holds the sole rights to any electric system capacity credits and environmental credits associated with the energy efficiency measures for which incentives have been received. Limit one dryer rebate per Vermont residential electric account per year and two per commercial account per year. Allow up to 60 days for delivery of rebate. Incomplete or missing information will delay processing and payment. For more information, call 888-921-5990.

I certify that I meet the eligibility requirements of this rebate program, and that all information submitted as part of this application is correct to the best of my knowledge. I agree to the terms and conditions listed above.

## THE ENERGY STAR DRYERS ELIGIBLE FOR THIS REBATE:

Use at least 20% less energy.

An ENERGY STAR certified washer/dryer pair will save you even more energy and money—certified washers get significantly more water out of clothes than conventional models, allowing certified dryers to use less heat.

Only products delivering the highest level of energy efficiency are awarded the ENERGY STAR from the U.S. Environmental Protection Agency and the U.S. Department of Energy.

[Learn more at www.energystar.gov](http://www.energystar.gov)

The ENERGY STAR Most Efficient designation recognizes the most efficient products among those that are certified by ENERGY STAR.

## How Heat Pump Dryers Work

Heat pump and hybrid heat pump dryers consume a fraction of the energy that a typical electric dryer does by using a refrigeration system to dry and recycle hot air:

- 1 Damp air leaves the drum
- 2 Heat is transferred to the refrigerant as air is cooled and water vapor is condensed
- 3 Hot refrigerant returns heat to the dry air and recycles it back into the drum
- 4 Hybrid heat pump dryers also contain electric heating elements (to keep cycle times down)

The heat pump is similar to those used in air conditioners — the cold part of the system is used to remove moisture from the air and condense water while the hot part is used to heat the air returning to the drum to dry your clothes.

## Which Dryer is Right for you?

	ENERGY STAR Certified Dryers	Select ENERGY STAR certified dryers with hybrid heat pump technology	Select ENERGY STAR certified dryers with heat pump technology
Rebate	\$50 standard rebate	\$200 plus rebate	\$400 premium rebate
Energy Savings vs. Conventional Dryer	up to 20%	up to 40%	up to 60%
Benefits	<ul style="list-style-type: none"> <li>Automatically shut off when clothes are dry with advanced moisture sensors</li> <li>Reduce wear and wrinkle on clothes</li> </ul>	<ul style="list-style-type: none"> <li>Use lower temperatures; gentler on clothes</li> <li>Contain heat pump technology and traditional electric resistance elements, providing the flexibility to dry clothes faster when necessary</li> <li>Some models do not require a vent*</li> </ul>	<ul style="list-style-type: none"> <li>Use lower temperatures; gentler on clothes</li> <li>Increased energy savings: the most efficient dryers on the market</li> <li>Some models do not require a vent*</li> </ul>
Considerations	N/A	<ul style="list-style-type: none"> <li>Speed cycles dry faster but use more energy (check manual for most efficient cycles)</li> <li>Requires a drain (can use existing washer drain)</li> <li>Should not be installed in unconditioned spaces</li> </ul>	<ul style="list-style-type: none"> <li>May take longer to dry clothes than traditional or hybrid dryer models</li> <li>Requires a drain (can use existing washer drain)</li> <li>Should not be installed in unconditioned spaces</li> </ul>

\*Ventless models are a great option for efficient buildings and tight construction, and can be installed in more areas of the home.
