

Weatherization Rebate for attics and/or basements

Steps to Getting Your Rebate

- Confirm eligibility (see page 2). Burlington Electric Department and Vermont Gas Systems customers are not eligible.
- Work with a contractor of your choice to complete a weatherization project meeting criteria specified below.
- Complete and sign rebate form.
- Submit form with contractor's invoice, including company name and installation date.

Attic and/or Basement Weatherization

Eligibility Requirements

- Attic and/or basement air sealing and insulation must be installed by a contractor in an existing single family home in Vermont (home must not share attic or basement with a neighboring unit).
- Regardless of whether project is in the attic or basement, earthen floors must be covered with a vapor barrier, and wet basements/crawlspaces must be made substantially dry.
- Exposed foam plastic interior wall covering must be installed in compliance with the 2018 International Residential Code (sections R316.4 through R316.6)
- Projects will be ineligible if vermiculite has been disturbed or knob and tub wiring has not been properly removed or disconnected.

Attic — attic flats and knee walls (where applicable)

Total attic square footage: _____

I certify that I have:

<input type="checkbox"/> Insulated to a minimum of R-49	<input type="checkbox"/> Protected insulation from wind at eave(s)
<input type="checkbox"/> Air-sealed all holes, seams, and bypasses	<input type="checkbox"/> Air-sealed and insulated attic access hatch(es)

Basement/crawlspace - foundation walls and rim joists (must treat both)

Total basement square footage: _____

I certify that I have:

<input type="checkbox"/> Insulated to a minimum of R-15	<input type="checkbox"/> Insulated using spray foam or board foam
<input type="checkbox"/> Air-sealed all holes, seams, and bypasses	

Note: There are many aspects to effective weatherization of buildings, including moisture control and adequate supply of air for combustion and occupant health. If you have questions about eligibility or how to meet any of the criteria above, please contact Efficiency Vermont at 888-921-5990.

Primary Heating System

Fuel Type

- Oil Propane Cord wood

 Heat pump Space heater (pellets, oil, gas, propane, kerosene)
Woodstove (select one): 1990-present (catalytic or non-catalytic)
 Pre-1990 (catalytic) Pre-1990 (non-catalytic)

Program Eligibility & Exclusions

Rebate offer is for Vermont single family home owners, is available to customers of select Vermont utilities as of March 1, 2019, and is subject to change without notice. Customers of Burlington Electric Department and Vermont Gas Systems are not eligible for this rebate. Incomplete forms may delay or disqualify your rebate after work is completed. In the event a rebate is discontinued or changed, submissions will be honored at the higher amount if the project was completed prior to the effective date of the change, with rebate submission occurring within 30 calendar days of that date. Customer must contribute at least \$250 to the pre-tax project cost. Allow 60 calendar days for payment after Efficiency Vermont has received your rebate application. Limit one rebate per location (attic/basement) per residence. Cannot be redeemed in addition to Home Performance with ENERGY STAR rebate (for the same scope of work).

Customer is responsible for ensuring that home improvements are installed, operated, and maintained in compliance with all applicable laws, codes, regulations, rules, standards, and manufacturers' instructions. Home improvements for which rebates are paid must comply with Efficiency Vermont program specifications. Projects will be ineligible if vermiculite has been disturbed or knob and tube wiring has not been properly removed or

disconnected. Contractors completing projects in homes built before 1978 must adhere to the U.S. Environmental Protection Agency requirements for the maintenance and renovation of lead-based painted surfaces and are required to be Lead-Safe Certified Renovators to perform renovation and repair work in areas that disturb lead-based paint. Any exposed foam plastic interior wall covering must be installed in compliance with the 2018 International Residential Code (sections R316.4 through R316.6).

Efficiency Vermont conducts site visits for a percentage of homes where rebates were paid to verify that the work performed is consistent with program specifications. They do not encompass and shall not identify violations of any other law, code, or regulation, including but not limited to local building codes. Customer is responsible for ensuring that all home improvements comply with all applicable local building codes in consultation with a local building official when necessary. Efficiency Vermont reserves the right to reclaim any rebates (or portions of rebates) paid in the event it determines the presence of any fraud, misrepresentation, or inaccuracy in the information provided, regardless of whether a verification site visit has been performed.
