

Select ENERGY STAR® Electric Clothes Dryers Eligible for Efficiency Vermont Rebate through 12/31/2018**

*One rebate per Vermont electric account per year.

**Efficiency Vermont rebates are evaluated on a regular basis throughout the year to determine if program can continue for next cycle.

Efficiency Level	Minimum Energy Factor (EF) or Combined Energy Factor (CEF)	Maximum Test Cycle Time	Efficiency Vermont Rebate
Federal Standard ₂₀₁₅ Standard Size	EF ≥ 3.73	n/a	n/a
ENERGY STAR V1.0 Standard Size	CEF ≥ 3.93	80 min	\$50
ENERGY STAR Most Efficient 2018 Standard Size with <u>Hybrid</u> Heat Pump Technology*	CEF ≥ 4.3	80 min	\$200
ENERGY STAR Most Efficient 2018 Any size with Heat Pump Technology*	CEF ≥ 5.7	80 min	\$400

*Models qualifying for the \$200 rebate are **hybrid** heat pump dryers that contain one or more electric resistance elements along with the heat pump. Models qualifying for the \$400 rebate do not contain an electric resistance element and represent the most efficient dryers on the market. Energy Factor (EF) is the weight of clothes dried per unit of energy used (lbs. / kWh), as measured by the Department of Energy (DOE). Combined Energy Factor (CEF) is the clothes dryer test load weight (lbs.) divided by the sum of the per cycle standby and off mode energy consumption and the total per-cycle electric dryer energy consumption.

Qualifying Models

Updated 12/1/2018

For most up-to-date list of qualifying products, please visit efficiencyvermont.com

¹Asterisks (*), plus signs (+), or pound signs (#) indicate that any variable may be used in place of the symbol.

²All products will be listed as eligible *until the end of the current rebate cycle*, unless a model is delisted. Following delistment, the following month's Qualified Product List will list a new 'For Purchases Made Before' submission deadline for the delisted model.
