ENERGY STAR® Emerging Technology Award 2019 criteria for Room Air Conditioners with Efficient Variable Output (EVO)*	\$200
<p>This list is for qualifying room air conditioners with Efficient Variable Output (EVO). Models are qualified based on the U.S. Environmental Protection Agency's 2019 ENERGY STAR Emerging Technology Award (ETA) specification, found at: <a href="http://www.energystar.gov/about/awards/2018-2019_room_air_conditioners_efficient_variable_output">www.energystar.gov/about/awards/2018-2019_room_air_conditioners_efficient_variable_output</a></p> <p>Products not listed here or on the ENERGY STAR ETA 2018-2019 for Room Air Conditioners with EVO list, are not eligible for a rebate.</p>	

\*Use of EVO controls the speed and operation of the compressor. These units also must be capable at noise levels below 45 decibels (dBA), are approved for use and available for sale in the U.S. market, and outperform the U.S. Dept of Energy (DOE) Federal Minimum Combined Energy Efficiency Ratio (CEER) by at least 35% for models with capacity  $\geq$  14,000 BTU/hour, or at least 25% for models with capacity < 14,000 BTU/hour

This list is subject to change at any time. The most up-to-date rebate information and eligible products will always be posted at [efficiencyvermont.com/rebates](http://efficiencyvermont.com/rebates)

<sup>1</sup>Asterisks (\*), plus signs (+) or pound signs (#) indicate that any variable may be used in place of the symbol.

<sup>2</sup>If a model is delisted by ENERGY STAR or the rebate is expiring or changing, Efficiency Vermont will provide a purchase deadline for that specific product. It must be installed, and the rebate form submitted, no later than 30 days past the deadline to be eligible for the rebate amount at that time.
