

Central Wood Pellet Boilers & Furnaces
 Qualifying Products - effective 1/1/25

Eligible pellet systems are required to meet or exceed 85% peak efficiency. The table below presents EPA efficiency ratings for qualifying units using a different testing methodology that reflects the estimated average annual efficiency.

| Manufacturer | Model | Emission Rate Annual Avg. (lb/mmBTU) | Heat Output Max. (BTUs) | Efficiency | Type | Fuel Type | CO | NSPS Compliance |
|----------------------|--------------------------------|--------------------------------------|-------------------------|------------|-----------------|--------------|-------|-----------------|
