

# Structured Custom TLED Lighting Offer

## Offer Description

Retrofitting linear fluorescent fixtures with tubular LED lamps (TLEDs) provides energy-efficient cost-savings for businesses. For a limited time, Efficiency Vermont will be offering increased incentives for TLED replacements on pre-approved projects.

## Offer Details

- Offer equal to 100% of product cost for qualifying DLC v5.1 listed TLED lamps
- Projects must be pre-approved by an Incentive Agreement provided by Efficiency Vermont
- Minimum quantity of 250 lamps
- Maximum incentive of \$20 per lamp
- Incentive does NOT include labor, ballast replacement, wiring, sales tax, or disposal fees

## Project Details

Businesses are encouraged to work with their contractor on selecting an appropriate TLED lamp. Not all TLEDs are compatible with existing fluorescent fixtures. EEN Contractors are prepared to help businesses navigate product selection.

## Case Study

A small business in Vermont replaced 300 fluorescent lamps in their facility with TLEDs. This resulted in a 50% reduction in energy to operate their lighting, leading to over \$4,000 in annual energy savings.

## Ensure your energy efficiency project is a success.
