

Variable Frequency Drive (VFD) Contractor Bonus

Offer Description

HVAC/Mechanical/Electrical/Controls contractors — get rewarded twice! First for identifying eligible VFD opportunities at commercial facilities and then again after completion of the installation project.

A **Variable Frequency Drive (VFD)** enables motors to run only as fast as needed, which saves energy and reduces wear on equipment.

VFDs can save your customers energy and help their motors last longer. Opportunities for VFDs include fans and pumps that are part of HVAC and industrial process systems.

Offer Details

Get a Contractor Bonus of up to \$30 per horsepower:

- **Pre-Installation:** \$10/hp for eligible opportunities submitted
- **Post-Installation:** An additional \$20/hp upon EVT-verified installation and functional testing

Contractor Bonus:

**Up to
\$30/HP**

How to Redeem

www.encyvermont.com/contractorvfdbonus

Help your customers see the benefit of VFDs

- **Customer Rebates Available:** \$200/HP (3 to 5 HP motor) or \$150/HP (7.5 to 100 HP motor)
- **Energy Savings:** A 10-ton rooftop unit VFD saves on average 6,100 kWh, or \$915/year
- **Quick Payback:** 3 to 24 months (after rebate)
- **Better Reliability:** Reduces equipment wear and associated maintenance costs

Terms & Conditions

- VFDs must be new and must be controlled by an automatic signal
- This bonus offer is subject to change
- Contractors must be registered to do business within the state of Vermont
- Projects within the city of Burlington are not eligible for this incentive or for the customer rebate
- See submission form for complete Terms and Conditions

Ensure your energy efficiency project is a success.
