

Double Incentives for Business

For a limited time, double your money back on custom efficiency upgrades.

Your to-do list is already filled to the brim. For a limited time, Efficiency Vermont will double your rebate to check off an efficiency upgrade for your business. That's up to \$25,000 in additional cash to make your project more affordable. Tip your hat to savings!

HOW IT WORKS

Free energy consultation

An Efficiency Vermont energy advisor will work with you to identify your business's biggest opportunities for energy savings. We'll give you a prioritized breakdown of projects so you can choose where to begin.

Customized project plan & incentive

We'll work closely with you to figure out which efficiency projects make the most sense for your business and then calculate how much you're going to save and how much financial support we can provide. For a limited time, we'll double whatever incentive you would normally receive, up to \$25,000.

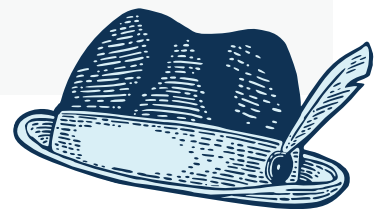

Ongoing support

Our partnership doesn't end when the project is complete: We'll be here to troubleshoot, answer your questions, and discuss future energy-saving opportunities.

We use a lot of energy. It can be difficult to break even on these efficiency projects. But this incentive got so much covered that we said 'great, let's do it.' We saw savings the very next month. It was a good investment, and a good experience with Efficiency Vermont.

- Gary Bourne, Notchbrook General Store in Stowe

Is your business eligible?

- Must be based in Vermont, including nonprofit organizations, institutions, and farm operations.
- Must be served by a Vermont electric utility. Restrictions apply for Vermont Gas Systems (VGS) and Burlington Electric Department (BED) customers.
- Projects must be completed by November 30, 2026.
- Projects must require custom analysis to calculate savings. Standard rebates, such as heat pumps, are not eligible.
- Projects must result in measurable energy savings over time and demonstrate a positive net present value (NPV).
- Projects must be pre-approved by Efficiency Vermont through an executed Incentive Agreement (IA).

Eligible projects may receive up to twice the custom incentive they would have normally received, with the total additional incentive capped at \$25,000 or 100% of the total project cost, whichever is less. The custom incentive is calculated by Efficiency Vermont using established customer economic modeling protocols. This offer can be combined with other incentives as long as the total incentive (including other Efficiency Vermont or third-party funding sources) does not exceed the total cost of the project.
